I modified the letter to say the facilities need to either be reclaimed or they need to have a postmining land use. This gives them the option of keeping some structures.

Hi Paul,

I would agree with the amount of the bond with the exception of the old shack by the portal with running water. That building was there long before Unico and could be used by the land owners for a cabin or whatever. Some of the old mining equipment such as the stamp mill ought to stay connected with the property as well.

I hope they don't get going on North Wash right away because I will be gone for three weeks starting the 28th.
